Week 5

Saving Energy At Home!

Saving Energy.

- From Gráinne and Fiachra, we've learned the importance of saving energy to help reduce Climate Change.

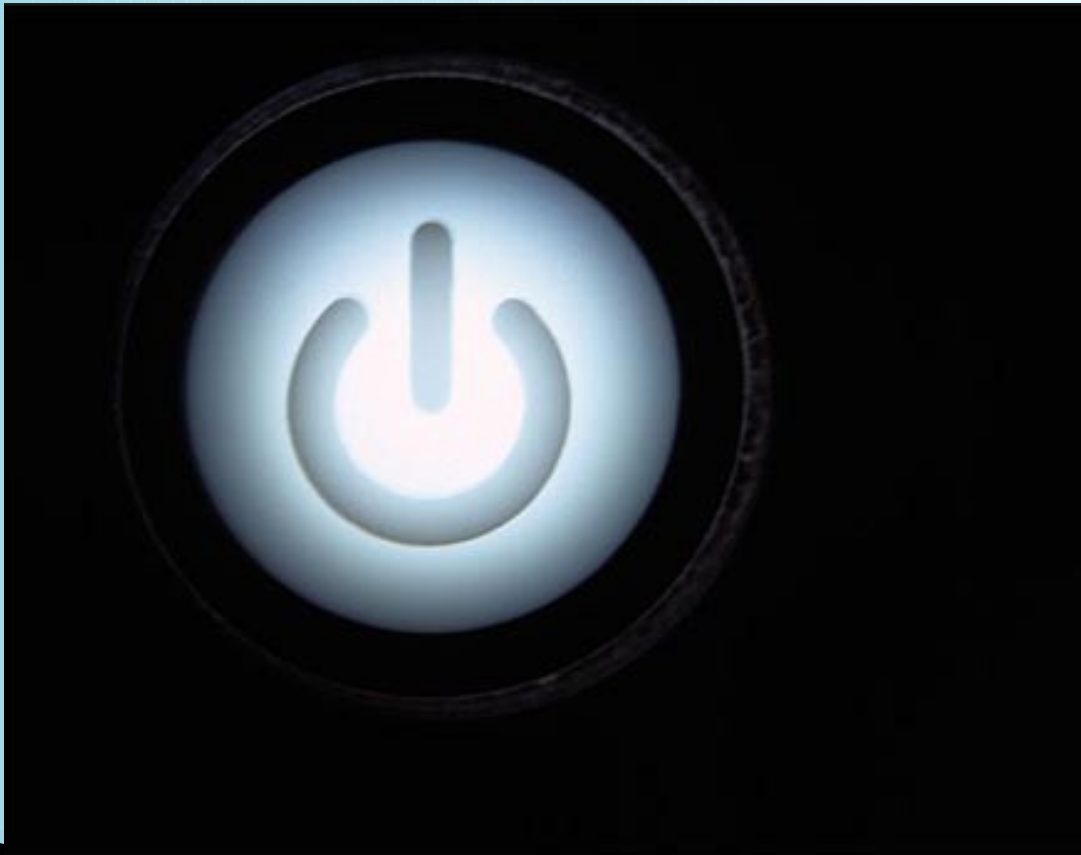

- Did you know your actions may have serious affects on our Planet?

- These actions include leaving a light switch on.

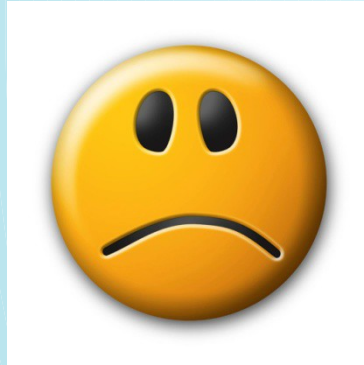

- Leaving the telly on standby

- Having a window open while your house is warming up!

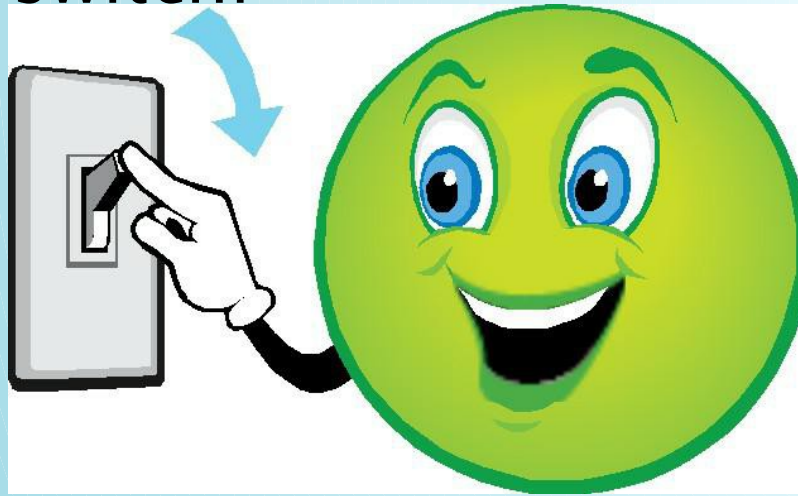

- These actions wastes an awful lot of energy.

- It may cost your Mam and Dad extra money due to the massive amount of energy consumption.

- You can reduce these actions by simply flicking a switch!

- These simple actions can save energy and make the world a better, safer place.
